1 Introduction to Machine Learning

Autonomous vehicles have to make decisions on various aspects of their execution. Artificial intelligence and more concretely its subfield Machine Learning is the field that heavily applies to this facet of autonomous driving. This section introduces the concept of machine learning. Concretely, this section attempts to answer the following questions:

- What is machine learning
- Which are the main categories of machine learning

1.1 What is machine learning

1.2 which are the main categories of machine learning
